

# TERRAZZO

offering a service second to none

A complete solution to screening projects of any size, with design, specification, installation and branding all part of the service

### Identifying your objectives

You may wish to use our screening to define an area with elegance. It may be you need to provide protection from the elements, or create a special ambience. Whatever your objectives, we will work closely with you to establish exactly what is wanted. All we ask is that you provide a simple informal plan or sketch of the area to be screened, together with some information about the ground and prevailing wind. Digital photos are always very useful, but detailed site surveys are usually not needed.

Our specifiers will generally be able to provide preliminary advice straight away. Furthermore, we will be delighted to recommend companies to provide additional products, such as awnings, parasols and heating, if these are required.

### Free professional design service

You may already have a very clear picture of how you want your screening to look, or you may have no ideas at all. Our in-house qualified design staff can provide a professional design service free of charge, which will include high quality visuals of the proposed screening installation, together with detailed costs based on accurate specifications. We will help you through the options and choices to achieve the very best results.

### Leave it to us

We will willingly manage the entire al fresco screening project for you, right up to and including installation. Our fitters are skilled and careful, guaranteeing a fabulous satisfying result.

### You can do it

Terrazzo screening is straightforward to install and is well within the capabilities of most competent fitters/jobbing builders. If you prefer to self-install and save on costs, that's fine by us. We will even supply the appropriate allen keys, along with the instruction guide for your convenience.

### Express delivery

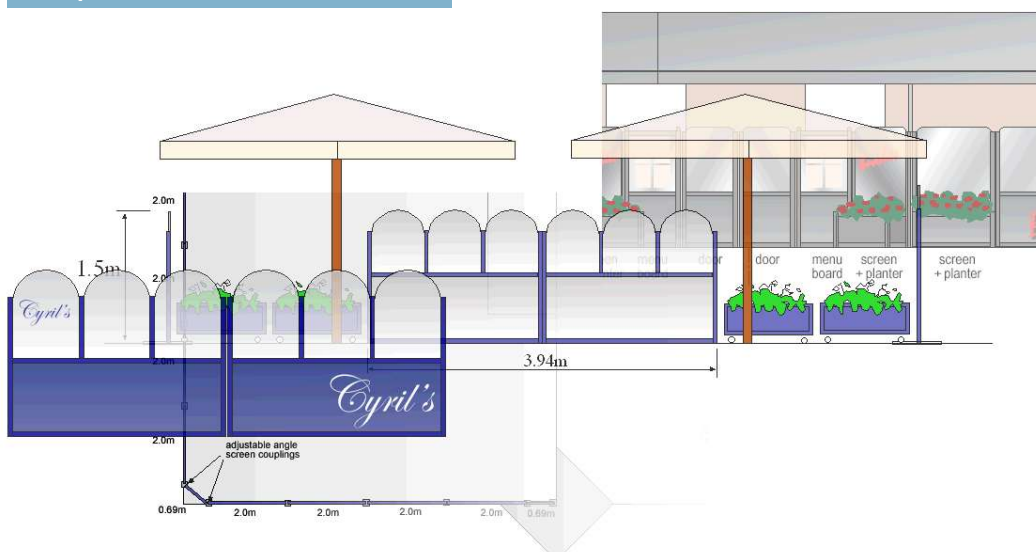

Each Terrazzo screening project is made to order. It is then carefully packaged and transported to site as a complete kit of parts. Typical lead-time from placing an order to receiving the complete kit is just 3-4 weeks. An estimated delivery date is always provided at the point of ordering.

### Recognition from afar

Branding is an effective way to increase the presence of your business. You can choose colours and designs that match your corporate appearance, and your logo can be applied to the glazed or solid infill panels, ensuring your customers can spot you in the crowd.

### There for you

Terrazzo screens are covered by a 5-year warranty and require no maintenance. However, you may still want our services further down the line – for example to dismantle and store screens. You may even want additional screens or the existing layout reconfigured. You will be assured of our best attention whatever your requirements. We can be contacted during normal office hours to discuss any matters on 01424 883344
